

Mahogany Regulator Longcase Clock

Sold

REF: 375954

Height: 209 cm (82.3")

Width: 45 cm (17.7")

Depth: 24 cm (9.4")

## Description

An extremely high quality regulator longcase clock dating to the Edwardian period, c.1910. It has a solid mahogany case of simple lines, having a canted top, with curved corners throughout the case, a long door with a thick bevel edge glass and crystal cut engraved starburst in the centre. The base also has a window to see when the brass weights require re-winding. The 12 inch silvered dial mask surrounds a 10 inch dial, with a finely engraved centre and a subsidiary seconds dial. The clock has a very substantial 8 day movement with a dead beat escapement, maintaining powers and sounds the hours and halves on a soft and sonorous chime bar. The metal wood pendulum and brass weights can be seen through the glass doors. Although unsigned, the movement is by a high quality English maker.
